## < APPLE IPOD MINI 4GB

Take a bite out of this green Apple! The iPod mini follows the success of the original iPod, which staked its claim as the best MP3 player on the market. The mini is about the same size as a deck of cards, though slightly narrower, and stores about 1000 songs. Songs are categorised into playlists, artists, albums, and genres, which makes scrolling through them convenient and quick. Navigating the device is via a very easy-to-control 'click wheel' at the front. The iPod mini casing is made from anodised aluminium and is available in silver and gold, as well as the lolly colours of pink, blue and green. The matt metallic finish is stunning. Oh, and by the way, it sounds great.

## < QLINK, STERLING SILVER

Have you ever wondered if the electromagnetic fields bouncing all around us from computers and mobile phones are doing us any good? QLink is a revolutionary device that combats these fields and other stressors on the body. At the core of this wearable device is Sympathetic Resonance Technology (SRT), which tunes your body and improves performance. QLinks are a huge hit with golfers, sportspeople and celebrities around the world who strive for sharpened mental focus. If you don't see an improvement within 100 days, return it for a full refund. Now, take a deep breath and relax.

## < SONY CYBER-SHOT DSC-F88

If you haven't yet taken the plunge into digital photography, this impressive camera is sure to make a splash. Sony Cyber-shot cameras are fantastically easy to use and produce high quality images. While most compact digital cameras are point and shoot, what makes this F88 camera so special is its rotating lens. This means you don't have to point your camera directly at what you are shooting. For example, you could place your camera on the ground, twist the lens upwards, and take a photo of yourself standing in front of it. This is a 5.1 mega pixel camera with a Carl Zeiss 3x optical zoom lens. Small and stylish, this camera goes anywhere.

## ^ BLACKBERRY 7100V

You can be pretty sure when someone's talking about how essential they're not talking about a piece of fruit. BlackBerry has become 'the' email on the run. You can forward all of your email accounts to BlackBerry, your work and home accounts, and read them anywhere in the world. It is also a mobile phone and a place to store your contacts. Note that while it looks like a mobile phone, the 7100v does not use an alphanumeric keypad, like that found on your computer's keyboard. Getting used to sending and receiving email start at \$29.99.
